

Beyond Codes: Vertical Openings/Atria and Means of Egress.

AIA SEATTLE | FRIDAY, OCTOBER 16, 2015 | SEATTLE CITY HALL, BERTHA KNIGHT LANDES ROOM

** all sessions/speakers subject to change*

Session Speakers:

Samir Mokashi founded Code Unlimited to be a code consulting firm that is focused on problem solving. The vision for our company is to provide expertise that is reliable, reasonably priced and meets the expectation of our customers. Samir has the unique ability to bring clarity to a problem, or as he says “let’s draw the sandbox so we can play in it”.

This approach is vital in solving complex problems that can be overwhelming to most designers and other code experts. It leads to solutions that are technically precise, clearly understood, and simple to build and enforce. Incredibly capable in his code knowledge, and calm and resolute under pressure, he believes that there is a solution to any problem. His positive attitude of “glass half full” permeates throughout our company and in our interaction with customers and jurisdictions. He is the heart and soul of this company, but his vision for the company extends beyond individual expertise and focuses on building a team that is more than the sum of its parts. As a company, we value our ability to communicate with our clients just as much as our ability to deliver sound technical advice.
