Deborah Sigler
UW, Center for Integrated Design,
Discovery Commons Program Manager

transit

bus lines 111, 12

rsvp

aiaseattle.org/event/women-in-design-bullitt-center-tour/

The Bullitt Center is a significant step forward in the design of high performance buildings. The goal of net zero energy use was set for this six-story urban office building in cloudy Seattle. In addition to net zero energy, the project has reached the broader goal of achieving full certification under the Living Building Challenge, which takes a holistic approach to sustainable building design. The tour will explore how this building was conceived, designed and evaluate the building's post occupancy performance.

Presentations focusing on Occupant-Behavior-Driven Energy by

Julie Kriegh, PhD, AIA, LEED AP -

International Passive House Designer Principal,
KRIEGH ARCHITECTURE STUDIOS

Christopher Meek, AIA, IES

Associate Professor of Architecture at the UW and
Director of the Integrated Design Lab (UW IDL) at
the University's College of Built Environments.

Deborah Sigler, UW Center for Integrated Design
Discovery Commons Program Coordinator
